Project Overview

Project Name: Nutrition Assistant Application

Project Description:

Nutrition Assistant is a MERN Stack web application that enables users to manage personalized nutrition plans, track calorie and nutrient intake, monitor health progress, and receive meal recommendations. The platform also allows dietitians to manage clients, create meal plans, and monitor client progress through secure role-based dashboards.

Project Version: Version 1.0

Testing Period: 03 July 2026 – 05 July 2026

Testing Scope

Features to be Tested

- User Registration
- User Login
- JWT Authentication
- Role-Based Access Control

- **Client Profile Management**
- **Meal Plan Creation**
- **Meal Plan Update/Delete**
- **Nutrient Analysis**
- **Progress Tracking**
- **Dashboard**
- **Admin Panel**
- **Logout**

User Stories to be Tested

- **User can register successfully.**
- **User can log in using valid credentials.**
- **Dietitian can manage client profiles.**
- **Dietitian can create meal plans.**
- **User can view assigned meal plans.**
- **User can track daily nutrition.**
- **User can monitor progress.**
- **Admin can manage users and dietitians.**

Testing Environment

URL/Location: Localhost / Deployed Application

Frontend: React.js

Backend: Node.js + Express.js

Database: MongoDB

Browser: Google Chrome (Latest Version)

Credentials:

- **User: user@example.com**
- **Dietitian: dietitian@example.com**
- **Admin: admin@example.com**

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Status
TC-001	User Registration	Enter valid details → Click Register	Account created successfully	Account created successfully	Pass
TC-002	User Login	Enter valid email & password	Login successful and dashboard displayed	Successful	Pass
TC-003	Invalid Login	Enter wrong password	Error message displayed	Error displayed correctly	Pass
TC-004	JWT Authentication	Access protected page without login	Redirect to Login page	Redirected successfully	Pass
TC-005	Create Client Profile	Dietitian adds new client	Client added successfully	Client added	Pass
TC-006	Update Client	Edit client information	Updated successfully	Updated	Pass
TC-007	Delete Client	Delete selected client	Client removed	Removed successfully	Pass
TC-008	Create Meal Plan	Add breakfast, lunch, dinner and snacks	Meal plan saved	Saved successfully	Pass
TC-009	View Meal Plan	User opens Meal Plan page	Assigned meal plan displayed	Displayed correctly	Pass
TC-010	Nutrient Analysis	Log daily meals	Calories and nutrients calculated	Calculated correctly	Pass
TC-011	Progress Tracking	Update weight and calorie intake	Progress chart updated	Updated successfully	Pass
TC-012	Admin Dashboard	Login as Admin	Dashboard displays user management features	Working correctly	Pass

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Dashboard chart loading delay	Login → Open Dashboard	Low	Closed	Optimized API response

BG-002	Empty meal plan allowed	Create meal plan without food items	Medium	Closed	Added input validation
BG-003	Weak password accepted	Register with short password	High	Closed	Password validation implemented
BG-004	Unauthorized API access	Access protected API without token	High	Closed	JWT middleware fixed
BG-005	Mobile layout issue	Open dashboard on mobile device	Low	Closed	Responsive CSS improved

Overall Result

- Total Test Cases Executed: 12
- Passed: 12
- Failed: 0
- Critical Bugs: 0
- Application Status: Accepted for Deployment

This UAT document demonstrates that the Nutrition Assistant Application has been tested across all major modules—authentication, client management, meal planning, nutrition tracking, progress monitoring, and administration—and is ready for deployment.
